

SSF POLYMERS LTD.

— THE FUTURE OF LEATHER —

A COLLAGE OF DESIGN TEXTURE & COLOUR

ABOUT US

SSF Industries Limited is a public limited company with businesses across north India. The product that SSF makes ranges from Pu Foam, mattress, Pvc Pipe, Footwear, Mustard oil, Artificial Leather and many other product.

SSF Polymers Limited is a offshoot of SSF Industries Ltd. We are one of leading manufacturer of Artificial leather/Pvc Vinyl.

SSF Industries took a big leap in the year 2008, when it started with the production of synthetic leather. Renowned for its previous commitment and policies it soon found recognition and strong footing in the synthetic leather industry. Soon SSF became one of the pioneers into various new products using the 'Release paper transfer coating technology'. Within this 10 years of its successful production, SSF is come a long way with the help of its advanced technology and techniques. Soon SSF looks forward for an expansion where it plans to establish another two lines so as to make its capacity three times. That would make SSF amongst largest manufacturer of Artificial leather.

VISION & VALUE

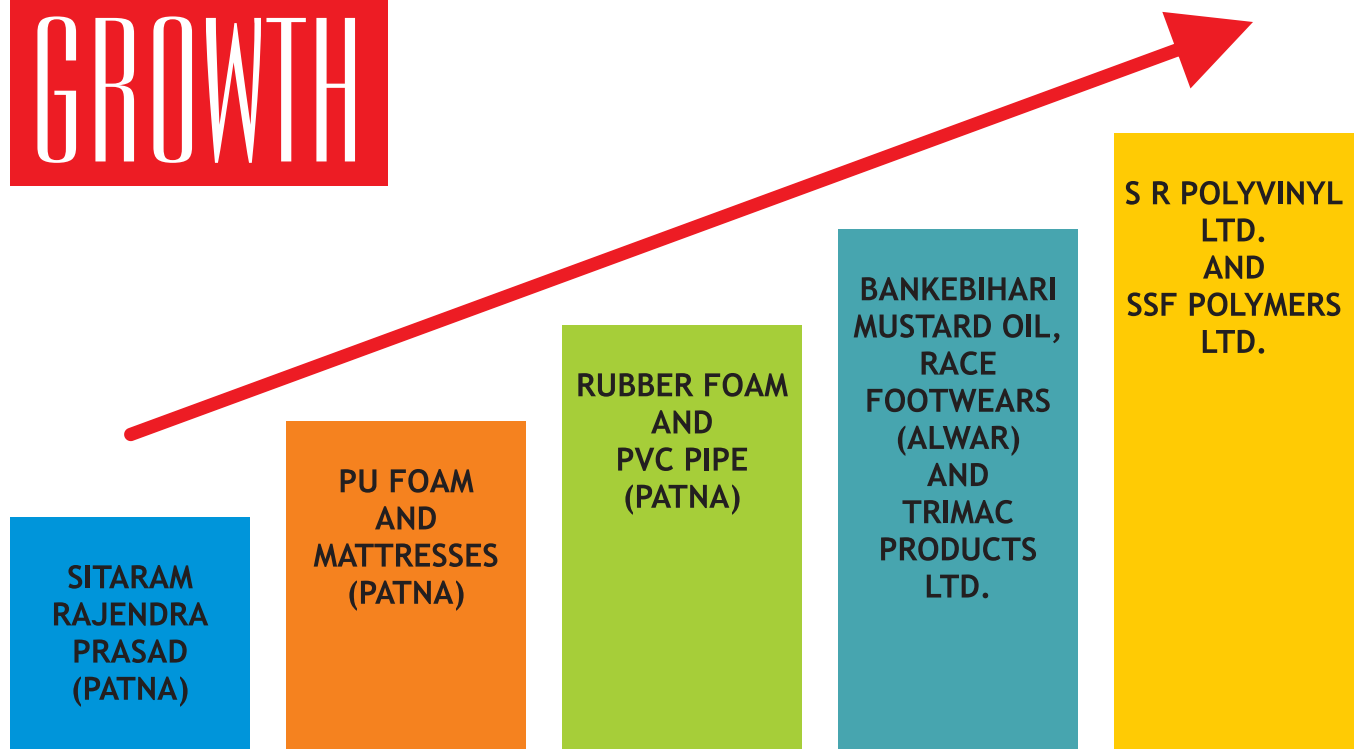

We aim at achieving the above through the following means : Targeting the right segment of customers and fulfilling their needs through constant development and quality enrichment. Aligning each step in the process of manufacturing that would enable us to deliver standard product timely delivery. Research and development through testing and parameters to ensure quality enriching customer association.

QUALITY ASSURANCE

SSF Polymers specialises in making artificial leather for a large number of segment. Product with specifications of the best standard and customer/segment needs are made using best of modern technology and know how.

GROWTH

FOOTWEAR

Backed by advanced technologies and modern tools, we offer a wide range of footwear leather that is manufactured with accuracy. We offer them in varied standard, designs and looks and add a decorative look to the interiors. Our entire product range is extremely stylish and has smooth finishing standards. Our footwear leather is easy to clean and is light in weight.

FURNISHING

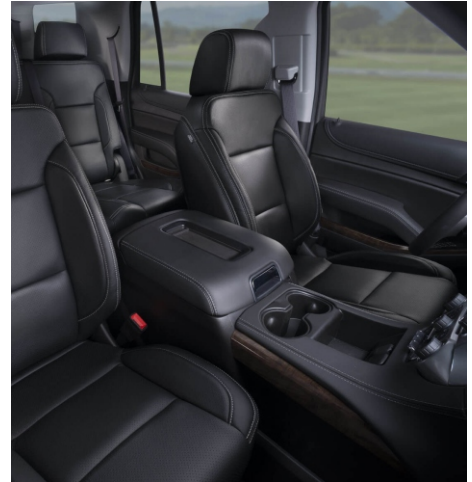

SSF Polymers offers a wide range of artificial leather for the furnishing industry. Furnishing Industry requires soft stretchable and strong products. We with our expertise make highest standard material for sofa, chairs, cushions cover etc for home offices commercial establishments and hotels.

AUTOMOTIVE

There are no segments where artificial leather is used and SSF not have its presense. We have association with the largest automotive makers in india. The product ranges of seat upholstery, door pads steering wheel gear boot, roof lining hoods and sun visors. Our product enhances the look and feel of car interiors. The stretchibility of the product helps in comfort in different weather conditions, wheater it be summers or winter.

OTHER SEGMENTS

Artificial Leather is used in various other segments viza a viz, belt, diary, purse, garments, football, gloves. We feel proud to be associated with all of these segments.

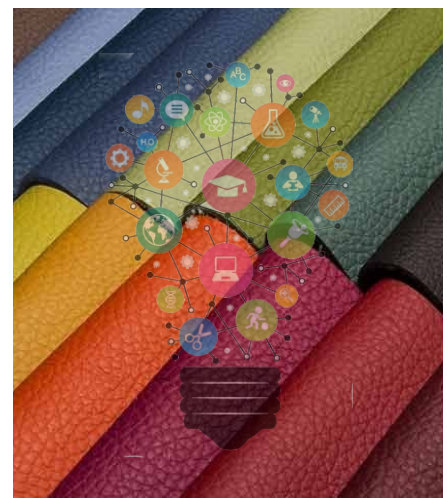

R & D

The SSF Polymers believes that innovation is the backbone of the processing industry. We have qualified engineers, technologists and polymer scientists who engage themselves in research and development.

We believe in continuous R & D to achieve path breaking innovations. We consider innovation as one of the pillars of strength. We try to ascertain the following through R & D :

- * Quality Competitiveness
- * Cost and Energy efficiency
- * Development of new and innovative products
- * Incorporating customer ideas into products

INFRASTRUCTURE

SSF Polymers Ltd has established itself as the industry leader with its state of the art infrastructure consisting of two transfer coating line, three printing m/c, one embossing m/c etc. The capacity of the plant exceeds six lakh linear length of production. The objective of the production is to produce unmatched quality.
